Profile

Junior Full Stack Engineer, able to translate business requirements into end-to-end technical solutions.

MSc graduate in Digital Engineering (ISEN Brest), with two internships in full stack development carried out with full autonomy. Proficient in React, TypeScript, FastAPI, Next.js and React Native, from front-end to cloud deployment. Looking for a permanent position in an ambitious engineering team to contribute to high-impact projects.

Professional Experience

Full Stack Developer Intern – Wheels&Trade.co

Casablanca, Apr. – Nov. 2025

- **End-to-end design and development** of a logistics platform from scratch: technical specifications, database modelling, REST APIs and front-end — MVP delivered in 7 months as the sole developer.
- **Direct functional requirements gathering** with the supervisor (real-time delivery tracking, driver management) and translation into technical specifications with no prior framework.
- **Full production deployment:** cloud hosting, CI/CD, post-deployment monitoring and bug fixes (zero major incident in acceptance testing). Stack: **React, TypeScript, React Native, FastAPI, PostgreSQL, Supabase, Railway, Vercel.**

Full Stack Developer Intern – INOVTEAM

Casablanca, Apr. – Sep. 2024

- **Corrective and evolutionary maintenance** of an existing web application: bug fixes with no regressions, technical documentation handed over to the team.
- **End-to-end feature development** with testing protocols and acceptance review before production release.
- **UI/UX redesign** in collaboration with the design team. Stack: **React, TypeScript, Next.js, PHP, Laravel, SQL, GitHub.**

Selected Projects

- **Linkpulse — URL Shortener with Analytics** [live demo](#) | [GitHub](#) : Production full stack app — real-time click tracking (country, OS, source), analytics dashboard, live design system with theme tokens, bulk delete, CSV export. CI/CD via GitHub Actions, Docker containerisation, deployed on Vercel. **Stack: Next.js 16, TypeScript, PostgreSQL, Drizzle ORM, NextAuth v5, Docker, GitHub Actions.**
- **Project Management Platform:** Web + mobile app — task planning, team tracking, dashboards, real-time notifications. **Stack: React.js, TypeScript, Nest.js, PostgreSQL, React Native, AWS.**
- **Interactive Portfolio:** Terminal-style personal website. [live demo](#) | [GitHub](#). **Stack: React, TypeScript, Vercel.**
- **Heating Simulation & Control:** Graphical interface on **STM32** microcontroller, developed in **C**, validated by simulation.

Education

ISEN – Institut Supérieur d'Électronique et du Numérique

Brest, Sep. 2022 – Nov. 2025

Master of Science in Digital Engineering – Software Engineering specialisation

- **Web & mobile dev:** TypeScript, JavaScript, React, Next.js, React Native, REST APIs, MVC
- **Architecture & databases:** UML, OOP, SQL, PostgreSQL, MySQL, Git, CI/CD, Agile
- **Embedded systems:** C, STM32 microcontrollers, FPGA

CPGE Elbilila Sup

Casablanca, Sep. 2020 – Jun. 2022

Preparatory classes for top engineering schools (MPSI/MP track)

Technical Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL

Frameworks: React, Next.js, React Native, FastAPI, Nest.js, Laravel

Databases & Cloud: PostgreSQL, Drizzle ORM, Supabase, AWS, Vercel, Railway

Tools: Git, Docker, REST API, CI/CD, GitHub Actions, Agile/Scrum

Languages & Interests

Languages: Arabic (native), French (C1), English (C1)

Interests: Reading, video games, fitness
